- Aftersun/moisturiser
- Sun protection (min factor 30)
- Dextrose tablets for extra energy*
- Dry shampoo*
- Dry wash*

DOCUMENTS

- Passport
- Visa(if required)*
- Tickets (given to you at the airport)
- Photocopy of passport
- Cash in GBP.
- Debit card
- Travel insurance

KEY * Indicates Optional

MAKING THE MOST OF YOUR KIT

PACKING

Check out Outdoorhire's useful tips on how to pack your kit bag [here](#). Remember that we recommend limiting your bag weight up to 15kg.

Please be aware that on your day sac, you will need to put 1 days worth of clothes for your trekking down to Monument Valley. You will be trekking with that rucksack down/up the Canyon, so don't over pack!

Your day sack should have a thick waist strap for maximum comfort. Other things to consider are back ventilation, hydration compatibility and gear loops for stowing walking poles. Waterproof liners or bags are essential for keeping valuables and clothes dry within your pack.

CLOTHES

Temperatures can fluctuate enormously from day-night and between campsites. Lots of light layers are key, as well as a synthetic or down jacket for the evenings. Make sure that you wear and test your kit before arrival, particularly your hiking boots.

SLEEPING

Look for a sleeping bag 'Comfort Rated' as close to the anticipated minimum temperature for your trek. For the Grand Canyon Trek, this should be between 10- 5. If you particularly feel the cold then upgrade your sleeping bag to the next level eg. from 4 Season to 4+ Season. Don't forget a silk sleeping bag liner for extra comfort without taking up too much space in your pack. Another handy tip is to keep your camera in your sleeping bag as you sleep. This will conserve the battery, which runs down quickly in cold temperatures.

HYDRATION

At high temperatures and humid conditions, keeping well hydrated is extremely important. There are various ways to get the right fluids into your body, with many people using water bladders or bottles. Another alternative is a widemouth bottle with a drinking tube adaptor ([click here for an example](#)).

See Outdoorhire's top tips for hydration [here](#).

HEALTH

Make sure you take a first-aid kit with you, as the group medical kit is designed for emergencies. Zinc Oxide tape is a handy addition, as it is often a lifesaver for blisters. Tape up your feet before trekking and this will reduce the chance of you developing hotspots. In addition, when applying your sunscreen, make sure that you cover the backs of your hands as well as your face and neck. Although you may feel cold, the sun will be stronger on the mountain. Don't forget to take an SPF stick for your lips as well.
