

One of the most common pre-trip questions we receive is all about what to pack, and what the essential items are. This is a list of recommended kit to take on this trek. We have tried to pare down this kit list to the absolute must-haves for your trek, but above all you should use your common sense and your own personal preferences when you are packing. Check out our additional guidelines at the bottom of this list!

RUCKSACKS AND BAGS

- Day sack 25-30L
- Large Rucksack/Duffle bag
- Waterproof liner*

SLEEPING

- Dry wash*

DOCUMENTS

- Passport
- Tickets
- Photocopy of passport
- Cash in Jordanian Dinar
- Debit / credit card
- Copy of travel insurance

KEY* Indicates Optional

****** Knee-length shorts are okay once on trek.

If you do not own some of this equipment and do not wish to spend a lot of money on buying equipment then we would highly recommend hiring equipment from our partners at [Outdoorhire](#). They can hire really good quality outdoor equipment for weekends and often hiring a high-quality piece of equipment is better than purchasing a cheap version

MAKING THE MOST OF YOUR KIT

PACKING

As no formal clothes are needed, luggage should be kept to the absolute minimum. During this challenge, bags will be transported by bus and 4 x 4 vehicles.

Your day sack should have a thick waist strap for maximum comfort. Other things to consider are back ventilation, hydration compatibility and gear loops for stowing walking poles. Waterproof liners or bags are essential for keeping valuables and clothes dry within your pack.

CLOTHES

Temperatures can fluctuate enormously from day-night and between the bottom of the mountain and the summit. Lots of light layers are key, as well as a synthetic or down jacket. Make sure that you wear and test your kit before arrival, particularly your hiking boots.

Please remember that Jordan is an Islamic country, so modest dress is preferable in the towns and cities. Shoulders should be kept covered, and full-length trousers/skirts are recommended. Knee-length shorts are okay once on the trek.

SLEEPING

Look for a sleeping bag 'Comfort Rated' as close to the anticipated minimum temperature for your trek. For this trek this should be between 10° and -10° C. If you particularly feel the cold then upgrade your sleeping bag to the next level e.g. from 4 Season to 4+ Season. Don't forget a silk sleeping bag liner for extra comfort without taking up too much space in your pack. Another handy tip is to keep your camera in your sleeping bag as you sleep. This will conserve the battery, which runs down quickly in cold temperatures.

HYDRATION

During exercise your fluid needs increase dramatically and hydration is vital. There are various ways to get the right fluids into your body, with many people using water bladders or bottles. Another alternative is a widemouth bottle with a drinking tube adaptor. You could carry a litre Nalgene bottle as this can act as a spare if the bladder is split and also can be used as a handy hot water bottle!

HEALTH

Make sure you take a first-aid kit with you. Zinc Oxide tape is a handy addition, as it is often a lifesaver for blisters. Tape up your feet before trekking and this will reduce the chance of you developing hotspots. In addition, when applying your sunscreen, make sure that you cover the backs of your hands as well as your face and neck. Don't forget to take an SPF stick for your lips as well.
