- Gaffa tape for emergency repairs
- Alarm clock/watch
- Ear plugs
- Dextrose tablets for extra energy
- Dry shampoo
- Dry wash
- Deep heat
- Knee supporters
- Smart clothes for the celebratory meal

MAKING THE MOST OF YOUR KIT

PACKING

Check out Outdoor Hire's useful tips on how to pack your kit bag [here](#). Remember the general rule that if you don't need it, don't bring it. A soft duffel is easier to find your kit in and less likely to be damaged than a framed backpack and should weigh no more than 15kg, so don't overpack!

On a bike a decent [bum-bag](#) is hard to beat for carrying valuables and essentials. Protect valuables from rain with a small rolltop dry bag.

CLOTHES

A pair of padded cycling shorts will make a huge difference to your comfort and dedicated [cycle gloves](#) help to protect your hands while in the saddle. For all round usefulness in the great outdoors Outdoorhire recommend the [Montane Prism Midlayer](#) jacket, it's lightweight, windproof and warm and does everything a fleece does but better.

SUN PROTECTION

To protect yourself from the sun use a lightweight peaked cap that's comfortable under your helmet and at other times wear a wide brimmed hat. On a bike the back of your neck and the back of your legs are more exposed than usual, don't forget sunscreen on these areas.

HYDRATION

When exercising your fluid needs increase dramatically and adequate hydration is vital. There are various ways to get the right fluids into your body, with many people using water bladders or bottles. Another alternative is a wide-mouth bottle with a drinking tube adaptor. Adding oral rehydration tablets or electrolyte powders to your water helps to maintain a correct electrolyte balance and also makes your water more palatable. Make sure you follow the mixing instructions on the pack and wash bottles and bladders thoroughly after use because the nutrients can help promote bacterial and mould growth.

See Outdoor Hire's top tips for hydration [here](#).

HEALTH

Make sure you take a first-aid kit with you, as the group medical kit is designed for emergencies. Zinc Oxide tape is a handy addition, as it is often a lifesaver for blisters. Good hand hygiene is very important on any sort of challenge and will help to prevent tummy problems. Wash your hands whenever you eat and use Dry Wash Gel when washing facilities are not available.

If you do not own some of this equipment and do not wish to spend a lot of money on buying equipment then we would highly recommend hiring equipment from our partners at Outdoorhire. They can hire really good quality outdoor equipment. Often hiring a high quality piece of equipment is better than purchasing a cheap version.
